After a few days you may notice some peeling and possibly a little scabbing. It is at this point in the healing process that our tattoo will begin to itch. **RESIST THE URGE TO SATISFY YOUR DESIRE TO SCRATCH, RUB, OR PICK** at the tattoo.

Remember -- the first few days and weeks (for a new tattoo) are probably the most important for your new tattoo. Make sure you care for it properly. Seek medical help or see a physician if you experience symptoms such as excessive swelling, redness, yellow or green discharge, fever, or see streaks running towards the heart-which indicate signs of an infection.

Do not actively participate in water sports or activities, garden, or play with animals until the tattoo has healed. Keep the tattoo out of direct sunlight, and follow any other requirements set forth by the practitioner.
