Evolution of Behavioral Health in the Public Sector

Robert Paul Cabaj, MD
Medical Director, San Mateo Behavioral Health and Recovery Services
Associate Clinical Professor in Psychiatry, University of California, San Francisco

Major Factors Shaping Policy and Delivery of Behavioral Health Care
- Social Attitudes
- Politics
- Funding
- Legal and Administrative Precedents

Approaches to Behavioral Health in the Public Sector
- History of mental illness—"Ship of Fools"
- Mentally ill—part of the community or isolated and contained
- Focus on mental illness or mental health (including prevention)
- Social tolerance or neglect of the mentally ill
- Substance abuse social issue or medical illness or both
- Treatment of symptoms only or recovery, rehabilitation, and wellness
Origins of the Current Community Behavioral Health System in the United States

- State versus Federal responsibility for mental Health—Origin of State Hospital system
- Somatic treatments; eventual "warehousing" in state hospitals
- National Institute of Mental Health in 1948
- Joint Commission on Mental Illness and Health in 1955
- New Medications—Anti-psychotics and anti-depressants

CMHC Act 1963

- Immediate care for acutely disturbed patients
- Mental illness a core problem, focus of the mental health movement
- Fully staffed, full-time Mental Health clinics per 50,000 people—SF and SM almost did it!
- Smaller state hospitals (<1000 beds)
- Expanded aftercare and rehab services in the community

CMHC Amendments 1975 (I)

- Top Priority: People most disturbing to the Community
  - Serve children
  - Serve aged
  - Follow formerly institutionalized
  - Screen before admissions
  - Alcoholism services—for the first time
  - Drug abuse services—for the first time
  - Transitional housing
CMHC Amendments 1975 (II)
- Community Governing Board
- Quality assurance and utilization review
- Relationships with any local HMOs
- Servicing Medicare and Medicaid

Mental Health Systems Act 1980
- Minorities and underserved
- Serious mental illness
- Links with primary care providers
- Fund non-revenue services: consults, education, coordination, administration

Post 1980s Trends
- Financing shifts to states, local government
- Deinstitutionalization/changes in bed patterns
- Managed Care and HMOs/Gatekeepers and Carve-outs
- Rehabilitation and Recovery/Wellness
- Medication Revolution and costs
- Consumer participation
- Cultural Competency
- Substance Abuse treatments
- Criminalization of Mentally Ill

Principles of Public Psychiatry
- Population focus; proximate; immediate
- Prevention orientation and outreach
- Housing; stabilize living situation
- Community-based services; easy access
- Continuity of Care
- Evaluation and Outcomes
- Evidence Base practices
- Advocacy/Self-help/self-management
- Rehabilitation
- Wellness/Recovery/Resilience
- Cultural Competency
Newer Forces
- Least restrictive level of care—"Olmstead"
- Medication adherence and drug costs
- Evidence-based practices, including "brand names" like DBT, MST
- Reduced number of acute beds
- Community alternatives—Acute Diversion Units, Residential Services
- "Braided" Funding—weave funding streams to provide coordinated services
- Primary Care involvement
  - Medical home vs. specialty care?

California Model
- Counties responsible for Medi-Cal and indigent services (except State Hospitals and Corrections)
  - 1991 Realignment Funding (vehicle license fees; Bay Area favored)
  - Managed Care funding—cut then partially restored (for crisis; inpatient; and medications)
- Carve-out model
- Systems of care/Clinical Services and Supports
- Rehabilitation Model (vs. Clinic Model)
- Consolidation of out- and in-patient Medi-Cal
- Role of Primary Care Providers—Medi-Cal "Medical Necessity" criteria (diagnosis; functionality; not manageable by Primary Care)
- Pharmacy Costs—local vs. Medi-Cal

San Mateo: Major Sources of Public Mental Health Funding
- Realignment (state GF tied to VLF)—restructured
- MH Medi-Cal: 65% (Short-Doyle)
- FQHC (Primary Care)
- EPSTD—children’s services Medi-Cal (10% MATCH)
- Mental Health Services Act (Prop 63)—Realigned
- Local General Fund—Manager and Board of Supervisors driven
- SAMHSA Grants and other grants
- Healthy Families/Workers/Children/Kids—restructured
- Drug Medi-Cal—primarily Methadone
- AB 3632—mandate moved to school systems
- ACE, MCE, Medicare (CareAdvantage)
- Private Insurance
Mental Health Service Act (Prop 63)

- Passed in 2004; implemented 2006—1% tax on earning one $1 M
- Funding in several categories:
  - Clinical services and supports, including full service partnerships (ACT-type services);
  - Prevention;
  - Innovations;
  - Education, Training, and Workforce Development;
  - Housing (in collaboration CHA);
  - IT (time limited);
  - Infrastructure improvement for County-owned property
- Distribution formula favored Southern California

Dual Project: Medi-Medi

- Starting in Sept 2013, managed care for Medi-Cal/Medicare population
- Identify treatable conditions—primarily depression and substance abuse in population covered in active or not in active care
- Theoretically will save costs with coordinated, unduplicated care but difficult to know baseline costs since most Medicare provided in the private sector

Major Federal Public Sector Funding

- Medicaid
- Medicare
- VA
- Indian Health Services
- State Children’s Health Insurance
- Military Health Care
- Federal Employee Health Benefits Program
**Medicaid (Medi-Cal)**
- Started 1965; partial state and federal
-Mean-tested, US citizens and permanent residents
- Certain low-income adults, their children
- Pregnant women
- Parents of eligible children
- People with certain disabilities
- Elderly needing nursing home care
- Will expand in 2014 to all under 133%
- Some counties already adding coverage
  - MCE in San Mateo with Substance Abuse

**Medicare**
- Started in 1965; fully federal
- Over 65 or permanent disability or congenital disability
- Funds residency programs
- Part A: Hospital
- Part B: Outpatient
- Part C: Special Plan
- Part D: Drug benefits

**Supplemental Security Income (SSI)**
- Created 1972; started 1974
- Low income aged (over 65), blind, or disabled
- Federal funds
- In California, now managed via a coordinated care approach
Social Security Disability Insurance (SSDI)

- Income supplements to people with physical or mental conditions that prevent engagement in any "substantial gainful activity"
- Temporary or permanent
- Payroll tax funded (need to have worked)
- Not income related

Policy and Challenges

Stephen Kaplan LCSW
Director, Behavioral Health and Recovery Services

Complex Social Issues: Role of Behavioral Health

- Homelessness
- Housing
- Violence
- Poverty—role in foster care, BH
- Employment/education
- Health Inequities/Disparities
- Chronic inebriates
- Medical ERs,
- Stigma and discrimination
- Suicide prevention
Complex Service Delivery Issues

- Complex populations with limited BH awareness or desire to seek services
- Involuntary outpatient treatment—“Laura’s Law” problems
- LPS /5150 criteria—need for reform
- Conservatorship and medications
- Drug Medi-Cal
- Evidenced based/practice based evidence
- Staffing: Workforce Development

Complex Service Delivery Issue: Health Care Reform

- January 2014
- “Triple Aim”
  - Better care for individuals
  - Better health for populations
  - Reducing per-capita costs
- San Mateo’s Low Income Health Plan Waiver
- Community Service Areas

Complex Service Delivery Issue: Integration with Primary Care

- Bring care to the clients
- Integrated primary care and behavioral health care clinics
- Current Medical Home emphasis and shift from specialty BH care
- Medical Model versus Recovery Model
- Quadrant model of BH and PC needs
Complex Policy Issue: Criminal Justice

- Parole Realignment
  - Target population
  - Coordination with Probation
  - Treatment Approaches
  - Treatment Decisions
  - Sharing Information
- Individuals with Serious Mental Illness
  - Mentally Incompetent to Stand Trial
  - Balancing public safety and treatment
- Specialty Courts
  - (same list as Parole Realignment)
  - Juvenile Court-Incompetent to Stand Trial

Complex Policy Issue: Child Welfare/Child Trauma

- Emerging evidence based practices
- Changing legislative priorities
- Court Decisions
- Prevention Strategies
- Collaborative Service Delivery
  - Organizational Culture Differences
  - Funding
  - Case Decision Making
Challenges: Funding/Revenue
- Realignment
- Entitlement Demand
  - EPSDT
  - Drug Medi-Cal
- Underfunded Substance Use Services
- FQHC restrictions
- Medicare and rigid integrity standards
- MHSA--dedicated but at risk with State crisis
- Health Care Reform Matching Requirements

Challenges: Cost-of-Business Increases
- Labor, Insurance, Workmans Comp
- Rising pharmacy costs and polypharmacy
- State hospitals shifting costs:
  - Shared clients:
    - Developmental disabilities--Regional Centers
    - Dementias and other “organic” states--primary care

Challenges (among others): Now and Ahead
- Preservation of Existing Revenue Sources
- Adequate Funding for Substance Use Services
- Retention, Recruitment and Training of Staff
- Effective Engagement/Services for Diverse Populations
- Safe and Affordable Housing
- Complex Client Needs
- Accountability and Performance Outcomes
- Alternatives to out patient commitment
- Recovery and Wellness Promotion
- Parity in terms of adequate service provision
- Stigma
