

Vision Statements – Future Cordilleras Campus

The vision statements were crafted early in the planning to set the foundation for all of the work to create the future campus. These key visions were defined by a wide range of individuals including providers, family members, consumers, neighbors and others with vested interest in creating an optimal recovery environment for consumers. The crafting of the Vision Statements also took into consideration a desire to align with the County’s overall vision for future development, as defined in the publication *Shared Vision 2025*.

Focus on Wellness – *to be healthy*

The new Cordilleras campus will offer programs and services that are dedicated to the whole health and wellness of its consumers. The environment will support and reflect a productive individualized wellness path for all consumers.

Promote Respect - *to be livable*

The programs and services offered will provide a strong foundation of assuring dignity and respect for its consumers and staff. The programs and services will emphasize consumer’s choice, in a safe environment that inspires pride, motivates the spirit, accommodates diversity in culture and beliefs, instills optimism for personal growth and improves quality of life.

Build Community – *to be collaborative*

The programs and services offered at the new campus will build strong communities – amongst their own consumers, families, staff, and visitors, and add value to the surrounding community. The campus will become an integral part of its social surroundings, with its programs and services valued as innovative assets and its residents respected as citizens.

Heal through Nature – *to be environmentally conscious*

The programs and services offered at the new campus will capitalize on the beautiful serene natural setting to complement the process of wellness, rehabilitation and recovery. The new facilities will incorporate progressive sustainable design strategies, efficient building systems, and natural materials to the benefit of healthy people, place, and planet.

Strive for Recovery - *to flourish*

The new programs and services will help consumers realize their full potential, achieving their goals for recovery, and return to living independently in the community. We will develop a world-class model of care that sets a new standard for excellence, by drawing from current best practices and anticipating future advances in behavioral health care.
