EMS EVENT REPORTING

I. PURPOSE

This policy establishes a system of patient safety and EMS response-related reporting requirements for the purposes of review, data analysis, patient safety, and EMS system performance. This policy defines reporting requirements for events which may have the potential to cause community concern or represent a threat to public health and safety. It also defines the reporting and monitoring responsibilities of all EMS system participants.

II. AUTHORITY

California Health and Safety Code, Division 2.5, §1798.6

III. DEFINITIONS

Emergency Medical Services Agency (“LEMSA”) [or “Agency”]: The San Mateo County EMS Agency is designated as the Local Emergency Medical Services Agency (LEMSA) and is statutorily charged with primary responsibility for administration and medical control of emergency medical services in San Mateo County.

Reportable Event: An unexpected event/ occurrence during the dispatch, rescue, care, or transport of a patient requiring emergency medical care that is not the direct cause of serious physical, psychological injury, or the risk thereof, but does require investigation for the purposes of quality improvement.

Sentinel Event: Any unexpected event/ occurrence involving death or serious physical or psychological injury, or the risk thereof. The phrase “or the risk thereof” includes any process variation for which a recurrence would carry a significant chance of a serious adverse outcome. An Unusual Event/Occurrence is considered a Sentinel Event if it could reasonably be considered the direct cause of a death or serious injury. Sentinel Events warrant immediate investigation and reporting to LEMSA.

Unusual Event/ Occurrence: Any event or occurrence deemed to have impact or potential impact on patient care, and/ or any practices felt to be outside the norm of acceptable patient care. Unusual Events/Occurrences also cover events outside the “normal” flow of operations surrounding dispatch, response, rescue, and disposition of all EMS responses. Unusual Events/Occurrences may or may not have life threatening impacts.
