Needs Assessment Categories

1. Behavioral Health Workforce
2. Access to Services
3. Housing Continuum
4. Crisis Continuum
5. Substance Use Challenges
6. Quality of Client Care
7. Youth Needs
8. Adult/Older Adult Needs

Reference: Needs Assessment Summary

1) Behavioral Health Workforce

• This category captures the needs related to recruiting, developing, supporting and maintaining a sufficient workforce to address the needs and the diversity of the community. This includes supporting individuals with lived experience as clients and/or family members of clients of mental health and substance use services to join the workforce and support all services and programming.

• Data:
  • Lack of sufficient staff led to negative impacts to clients and families
  • Hiring Spanish bilingual mental health clinicians and Transition Age Youth Family Partners is challenging
  • Not enough therapists to meet the high demand of incoming clients
  • High staff turnover led to staff doing whatever it takes to fill the need at the cost of burnout and impacting staff wellness
  • Need a more diverse workforce, BHRS clinicians to share identities of clients for better care
2) Access to Services

- This category captures the needs of diverse cultures and identities such as race/ethnicity, LGBTQIA+, veteran status and age related to accessing mental health and substance use services, including community knowledge and education and culturally responsive approaches to engaging communities.

- **Data:**
  - **Race/ethnicity**
    - Depression related feelings for AA/Black youth (25.4%) suicide/self-inflicted injury (17.4%)
    - Asian/Asian Americans have less access to mental health and substance use knowledge, behavior and beliefs to support stigma reduction
    - Reports of trauma exposure are extremely high among Latina migrant women, with prevalence rates of around 75%
  - **LGBTQ+**
    - LGBTQ population most affected by suicidal ideation in age group (24-44), and has a lack of access to services and understanding by providers
  - **Children/youth and families**
    - Referrals for mental health services through primary care increased 100% for youth
  - **Social Determinants of Health**
    - Low-income parents have higher frequency of depressive symptoms compared to middle- and high-income parents, continued impact of COVID-19 pandemic on families in areas of housing, financial, and food instabilities
  - **Veterans**
    - Need support with access, younger veterans include more women that would like more services targeted towards sexual assault
  - **Older Adults**
    - 35% of older adults identified an areas of concern as depressed mood

3) Housing Continuum

- This category captures the housing needs for individuals living with mental health challenges ranging from assisted living facilities, to having access to permanent supportive housing, to early assessment of risk of homelessness and culturally responsive approaches and support with locating and maintaining housing.

- **Data:**
  - **Culturally Responsive Early Intervention Strategies**
    - Black, Indigenous, People of Color are over-represented amongst unsheltered
    - Largest number of unsheltered folks are located in East Palo Alto and Redwood City
  - **Navigation and Maintenance**
    - Supporting families with housing, both maintenance and housing vouchers
  - **Older Adults with Complex Needs**
    - Very limited supply of licensed board and care providers willing to care for clients with complex health needs and limited financial resources, also continuing closure of B &C facilities
    - Housing in a community setting with necessary supportive services for older adults has continually become an increasing challenge
  - **Risk of homelessness**
    - Housing crisis magnified for people living with mental illness
    - Aging parents struggle to find homes for their adult children with mental health challenges
    - Correctional health services reported need for continued warm hand offs into temporary housing
4) Crisis Continuum

- This category captures needs related to mental health and substance use crisis response, as well as appropriate community-based supports and stabilization during and after a crisis.

- **Data:**
  - Stabilization and supports
    - Premature discharge from inpatient hospitalization (5150) while client is seriously impaired, leading to clients repeatedly getting 5150d
    - Need for mental urgent care facilities and stabilization units
  - Response
    - Police officers, behavioral health providers and community stakeholders face challenges in determining and implementing the proper ways to intervene during a behavioral health crisis
    - In 2016 a quarter of all fatal police shootings nationwide involved people with behavioral health or substance use conditions
    - Need for non-law enforcement mobile mental health crisis programs and emergency response

---

**Input Session Questions**

1. What are possible solutions (services, programs, infrastructure, etc.) to address the need?
   - Direct Service, Prevention and Workforce strategy

2. If you had to select one solution from each strategy to focus on over the next 3 years, which would you prioritize?
