CLINICAL PEARL

- **Chemical Compounds in Certain Foods Can Inhibit an Important SARS-CoV-2 Enzyme:** According to a report published in *Frontiers in Plant Sciences* naturally occurring compounds found in green tea, muscadine grapes, and dark chocolate can bind to and block the function of the "main protease" (Mpro) in SARS-CoV-2. Computer simulations showed the chemical compounds from green tea, two varieties of muscadine grapes, cacao powder and dark chocolate were able to bind to different portions of Mpro and to inactivate it.

PUBLIC HEALTH UPDATES

- San Mateo County Health Officer, Dr. Scott Morrow, issued a statement on December 7th.
- The CA Notify mobile application, which will allow people who test positive to anonymously inform those with whom they have been in close proximity that they may have been exposed, is scheduled to launch statewide on December 10th.
- FDA authorized the first diagnostic test for at home collection of patient samples to detect both COVID-19 and influenza A and B (flu).
