Kindergarten Oral Health Assessment Notification Letter

Dear Parent or Guardian:

Having a healthy mouth helps your child do well in school. To make sure your child is ready for school, California law *Education Code* Section 49452.8 requires **every kindergartner in public school** *and only those first graders who were not in public school the prior year* to have an **oral health assessment/ screening** or dental check-up turned into their school at the beginning of the school year.

The Kindergarten Oral Health Assessment Form (attached to this letter) needs to be completed by a licensed dentist or other licensed or registered dental health professional. If your kindergartner or first grader enrolling in public school for their first year *has not* had the form completed by a dentist in the past 12 months, please go to their dentist to get it completed, and return it to your child's school.

If you cannot take your child to a dentist to get the oral health assessment/ screening, or if your child cannot attend an oral health screening event hosted at your school, please contact your school for help finding a dentist or for a waiver form.

Your child's identity will not be in any report. Schools keep students' health information private.

If your child is eligible for Medi-Cal but has *not* enrolled in Health Plan of San Mateo (HPSM) Dental:

Contact San Mateo County's **Health Coverage Unit** by calling toll free: **1-800-223-8383**.

Local number: **650-616-2002**. Email: info-hcu@mscgov.org.

Visit the website: http://www.smchealth.org/health-insurance.

To find a dental provider accepting Health Plan of San Mateo Dental:

Call the **Health Plan of San Mateo's Member Services** (toll free): **1-800-750-4776.**

Local number: **650-616-2133**. Email: Dental@hpsm.org.

Visit HPSM Dental's online dental provider directory to find a dentist here:

http://www.hpsm.org/member/hpsm-dental/choose-a-dentist.

For additional oral health resources:

Visit the Oral Public Health Program website: http://www.smchealth.org/oral-health.

We want your child to be healthy and ready for school! Here is important advice to help your child stay healthy:

- Baby teeth are very important, even though they fall out. Children need healthy baby teeth to eat, talk, smile, and feel good about themselves. Children with cavities may have pain, difficulty eating, stop smiling, and have problems paying attention and learning at school.
- Take your child to the dentist every six months, starting when their first baby tooth comes in. Dental check-ups can help keep your child's mouth healthy and free of pain, and are covered by dental insurance plans.
- Choose healthy foods and drinks for the entire family, like fresh fruits and vegetables, water and milk.
- Help your child brush their teeth at least 2 times a day with toothpaste that contains fluoride for 2 minutes, and floss daily.
- Limit candy and sweet drinks like punch, juice or soda. Sweet drinks and candy contain a lot of sugar, which causes cavities and leaves less room for your child to have healthy foods and drinks. Sweet drinks and candy can also cause weight problems, which may lead to other diseases, such as diabetes
- Fluoride is an important mineral that your child needs because it makes their teeth stronger and protects them from cavities. It is found in safe amounts in our drinking water and in toothpaste. Your dentist may recommend your child also receive fluoride treatments, like "fluoride varnish." Fluoride varnish is painless and painted on their teeth. If your family drinks mostly bottled water, your child may not be getting enough fluoride from water to protect their teeth. Fluoride treatments are free services covered by HPSM Dental every 6 months, or more frequently if your child has a higher risk of tooth decay.
- "Sealants" are painless, clear coatings ("seals") put on your child's permanent back teeth (molars). They are recommended for all children because they protect teeth from harmful bacteria and cavities, and they last for several years. Sealants are free (covered by HPSM Dental) for kids ages 5-20.

If you have questions about the oral health assessment requirement, please contact your child's school.

Kindergarten Oral Health Assessment Form

California law (*Education Code* Section 49452.8) says every child enrolled in kindergarten in a public school, and any child enrolled in first grade *who did not attend public school the previous year*, must have a dental check-up (assessment). It should be turned in at the beginning of the school year. A California licensed dental professional must do the check-up and fill out **Sections 2 and 3** of this form. If your child had a dental check-up in the last 12 months, ask your dentist to fill out Sections 2 and 3. If you are unable to get a dental check-up for your child, fill out the separate Waiver of Oral Health Assessment Requirement Form.

This assessment will let you know if there are any dental problems that need attention by a dentist. This assessment will also be used to evaluate our oral health programs. Children need good oral health to speak with confidence, express themselves, be healthy, and ready to learn. Poor oral health has been related to lower school performance, poor social relationships, and less success later in life. For this reason, we thank you for making this contribution to the health and well-being of California's children.

Section 1: Child's Information (Filled out by parent or guardian)

Child's First Name:	Last Name:	Middle Initial:	Child's Birth Date:
			MM – DD – YYYY

The law states schools must keep student health information private. Your child's name will not be part of any report as a result of this law. This information may only be used for purposes related to your child's health. If you have questions, please call your school.

Return form to the school *no later* than by the end of your child's first school year.

Original to be kept in child's school record.
