This is a new update in Soarian wherein MD or other providers can now view the digital radiology images on the Patient Record without logging on to the Picom Web.

There are 2 ways to view patient’s radiology result images;

1. From the Patient Record – click on the icon and the result image will open.
2. From the Patient Text Result, click on the View image button, the result will open.

Click on the image series on the left and the image will show on the right side of the screen.
Scroll the middle with your mouse to view the different angle of the images.
