2. Please clarify which specific sections of the RFP is the contractor to provide a response to?

Respond to Sections II, III.A, V.A, and V.B.

3. On page 6, Section V, B contractor is asked to provide a statement that addresses: “Describe your service model and approach to addressing the service needs of the target population, your approach to *working collaboratively with multi-agency partners*, and the geographic area of the County, if applicable”

Unclear what is meant by “multi-agency partners”. The RFI seems specific to just the County of San Mateo Behavioral Health Facilities.

This term “multi-agency partners” does not apply to this RFI. Could state working with client population with diverse ethnic, cultural, and language backgrounds served at County of San Mateo Behavioral Health Facilities.

4. What is going to happen to the other facilities (non-behavioral health) when the current contract expires if they are not part of the RFI?

Correctional Health is not included in this RFI. The San Mateo Medical Center will perform sample lab analysis for Correctional Health.

5. What is the term of the contract? There is no indication on the RFI.

The term of the agreement is July 1, 2017 through June 30, 2018, with the option to renew annually for an additional two years.
