Help Available Now

If you know someone in a suicidal crisis or emotional distress (warning signs below), please take it seriously and don’t leave them alone. Reach out to the following 24/7 confidential crisis support lines.

Call 1-800-273-8255 (TALK) Suicide Prevention Lifeline (United States)

Call 650-579-0350 Star Vista’s Crisis Hotline (San Mateo County)

Text “BAY” to 741741 Crisis Text Line (United States)

For physical/mental health emergencies that need an immediate response, call 9-1-1 or go to your nearest emergency room (if you can safely get there).

When calling 911 for mental health emergencies, refer to the guidelines for calling police to find out how to prepare and what to expect at smchealth.org/mh911. One important tip is to ask for a Crisis Intervention Trained Officer (CIT) to be dispatched.

Local psychiatric emergency services including the following facilities:

• San Mateo Medical Center 650-573-2662
  222 West 39th Avenue, San Mateo, CA 94403

• Mills-Peninsula Medical Center 650-696-5915
  1501 Trousdale Drive, Burlingame, CA 94010

Reach out to someone you are concerned about if you observe one or more of these warning signs, especially if the behavior is new, has increased or seems related to a painful event, loss or change:

• Talking about wanting to die or suicide
• Looking for a way to kill themselves or end their life
• Feeling hopeless, desperate, trapped
• Giving away prized possessions
• Putting affairs in order
• Reckless behavior
• Uncontrolled anger
• Increased drug or alcohol use
• Withdrawal
• Anxiety or agitation
• Changes in sleep
• Sudden mood changes
• No sense of purpose

For additional resources, including population-specific or non-crisis resources, please visit smchealth.org/SuicidePrevention.
Dedication

This plan is dedicated to people who we have lost to suicide, people who have attempted or thought about suicide, and their loved ones. Many, if not all of us, know someone affected by suicide. We honor your loss and suffering by advancing this plan with thoughtfulness, compassion and action..

With our individual and collective actions, lives can be saved from suicide.

There is hope.

Photo by Tatiana Lyulkin, Burlingame. Tatiana lost her mother to suicide.
Dear San Mateo County Community Members and Partners,

San Mateo County Behavioral Health and Recovery Services acknowledges suicide as both a personal and public health concern. Most, if not all of us, know someone who has thought about or attempted suicide, or we know someone who died by suicide. That someone may be our family member, coworker, neighbor, friend or role model. As tragic and devastating suicide can be to a person and community, there are many ways we can prevent suicide – from talking openly about suicide with another person, to creating a society that is more connected and resilient.

Suicide is also a complex public health issue that involves a variety of factors at the individual, relationship, community and societal level. While mental health is still a major factor of suicide, the Centers for Disease Control (CDC) reports many other factors that contribute to suicide, including relationship problems, crisis in the past or upcoming two weeks, problematic substance use, physical health problems, job/financial problems, criminal legal problems and loss of housing. With the current COVID-19 pandemic, these risk factors for suicide are exacerbated.

Embracing suicide as a personal and public health issue, San Mateo County created this 2021-2026 Suicide Prevention Roadmap to outline a strategy on how to collectively prevent suicide in our community. This Roadmap is part of a larger vision to reduce suicide deaths, suicide attempts and pain associated with suicidal thoughts so that everyone in our community can realize healthy and meaningful lives.

The Roadmap is informed by the best practices, resources, quantitative data and qualitative data, including input from community members and those with lived experience as suicide attempt or loss survivors. There are many uses and benefits of this Roadmap and we hope you can utilize it for one or more of the following ways:

1. Data to understand our local needs, best practices and inform local prevention efforts.
2. Education on how to approach, support and refer those who are at risk for suicide.
3. Resource directory of local suicide prevention programs and activities.
4. Opportunities to lead and/or collaborate that are guided by a comprehensive plan.

We all play a role in preventing suicide. Whether you consider yourself a suicide prevention expert or not, you can make important contributions in advancing the goals of this Roadmap and, ultimately, helping prevent suffering and loss due to suicide. As our community have gone through unprecedented changes and loss, it is more important than ever that we have as many partners as possible to implement this ambitious and comprehensive plan.

Thank you so much to those of you who have contributed to this Roadmap, continue to advance existing suicide prevention efforts and plan to join new suicide prevention endeavors.

In Community,

Scott Gilman
Director, San Mateo County Behavioral Health & Recovery Services
Sprinkled throughout the document, you will find artistic words from some of our Suicide Attempt and Loss Survivors in San Mateo County. We are grateful that they shared their voices to send messages of hope, resilience and recovery.

If you know someone who is in a suicidal crisis or emotional distress, please reach out for 24/7 confidential crisis support:

- call 650-579-0350
- (or 1-800-273-8255) or
- text “BAY” to 741741.
Suicide is a leading public health issue across the country, state and in our local county. While San Mateo County generally has lower rates of suicide compared to state and national rates, our county is committed to saving every life possible. There is also a need to examine suicide data more closely to identify specific demographic groups and factors that have increased suicide risk compared to the general population. Unless otherwise noted, the data used below is from 2017 because this is the most current year of data available across all levels of suicide data. San Mateo County is working to improve data infrastructure so we have more timely and detailed data.

### DEATH
- Suicide is the 14th leading cause of death in San Mateo County.
- 59 San Mateo County residents died by suicide.
- 7.9 per 100,000 population age-adjusted suicide death rate (2016-2018).[^1]

### ATTEMPTS
- 346 emergency visits were related to intentional self-harm in San Mateo County.
- 360 hospital admissions were related to intentional self-harm in San Mateo County.
- 1,475 estimated suicide attempts in San Mateo County based on the estimate of 25 suicide attempts for every one suicide death.[^4]

### THOUGHTS
- 9.5% adults reported that they ever thought seriously about dying by suicide (2017-2018).
- 13.4% 9th grade students reported that they ever thought seriously about dying by suicide (2015-2017).

### HELP SEEKING
- 1,176 calls from 650 area code to California Peer-Run Warmline.
- 5,684 calls from 650 area code to Institute of Aging Friendship Line.
- 5,316 calls from 650 area code to National Suicide Prevention Lifeline.
- 9,629 calls to Star Vista Crisis Hotline (San Mateo County).

Ecological Approach to Suicide Prevention Along Suicidal Crisis Path

**Social Ecological Model**
- frames risk and protective factors of suicide

**Social Crisis Path Model**
- frames suicidal behavior

**Continuum of Interventions**
- frames a continuum of interventions informed by suicidal behavior, risk factors and protective factors

**Executive Summary**
To address this public health priority, San Mateo County is publishing its second strategic plan – the Suicide Prevention Roadmap. This Roadmap is guided by **three frameworks that are compatible to the unique issues of suicide prevention and are comprehensive in framing the problems/opportunities and interventions.**

**Social Ecological Model**
- **INDIVIDUAL**
  - Biology, Knowledge, Attitudes, Skills, Education, Job Satisfaction, Health
- **RELATIONSHIPS**
  - People who can recognize warning signs and intervene
- **COMMUNITY**
  - Safe and supportive schools, workplaces, and community
- **PUBLIC POLICY**
  - Public and organizational policies, practices, and culture

**Ecological Approach to Suicide Prevention Along Suicidal Crisis Path**

**Individual, Interpersonal, and Community Level Stressors and Supports**

**Population**
- Prevent Problems from Happening and Promote Wellness
- Connectedness
- Life Skills and Resilience

**Higher Risk**
- Identify Problems Early and Connect People to Help
- Increase Help-Seeking Identify and Assist

**Suicidal**
- Safe and Compassionate Responses During and After a Crisis
- Care Transitions/Linkages

**Suicide Attempt**
- Reduce Access to Lethal Means Respond to Crisis
- Effective Care and Treatment Postvention

**Suicide**
- Effective Care and Treatment Postvention

*Adapted from image created by Los Angeles Suicide Prevention Network and Your Social Marketer, Inc.*
The 2021-2026 San Mateo County Suicide Prevention Roadmap is not only guided by comprehensive frameworks but also the latest research, data and best practices that shape the strategies and goals in the California’s Strategic Plan for Suicide Prevention 2020-2025. This has led to the creation of 4 strategic aims and 13 goals in the 2021-2026 San Mateo County’s Suicide Prevention Roadmap. Each goal includes the following components: rationale, long-term outcome, equity focus, current efforts and objectives. The strategic aims and goals are as follows:

**STRATEGIC AIM 1  Establish a Suicide Prevention Infrastructure**
- **Goal 1:** [Enhance Visible Leadership and Networked Partnership](#)
- **Goal 2:** [Increase Development and Coordination of Suicide Prevention Resources](#)
- **Goal 3:** [Advance Data Monitoring and Evaluation](#)

**STRATEGIC AIM 2  Minimize Risk Factors and Promote Protective Factors Across the Individual, Relationship, Community and Society Levels**
- **Goal 4:** [Create Safe Environments by Reducing Access to Lethal Means](#)
- **Goal 5:** [Empower People, Families and Communities to Reach Out for Help When Mental Health and Substance Use Needs Emerge](#)
- **Goal 6:** [Increase Connectedness Between People, Family Members and Community](#)
- **Goal 7:** [Increase the Use of Best Practices for Reporting Suicide and Promote Healthy Use of Social Media and Technology](#)
- **Goal 8:** [Strengthen Economic Supports](#)

**STRATEGIC AIM 3  Increase Early Identification of Suicide Risk and Connection to Service Based on Risk**
- **Goal 9:** [Increase Detection and Screening to Connect People to Services](#)
- **Goal 10:** [Deliver Continuum of Crisis Services](#)

**STRATEGIC AIM 4  Improve Suicide Related Services and Supports**
- **Goal 11:** [Deliver Best Practices in Care Targeting Suicide Risk](#)
- **Goal 12:** [Ensure Continuity of Care and Follow-Up After Suicide Related Services](#)
- **Goal 13:** [Expand Support Services Following A Suicide Loss](#)

After the creation and dissemination of this 2021-2026 San Mateo County Suicide Prevention Roadmap, the next steps include the following:
1. Recruit key action partners and build coalition
2. Develop action plan
3. Develop evaluation plan

One of the greatest strengths of our San Mateo County community is collaboration. Our willingness to partner and own suicide prevention as a collective concern will bring us far along in reaching our suicide prevention aspirations. **To stay informed and to get involved, please visit smchealth.org/SuicidePrevention.**
Suicide Trends in San Mateo County

“To all the people that don’t believe they matter to anyone or feel numb. You Should Be Here”

— From Letter To You photovoice by Vivian Valdez, San Mateo
Suicide Trends in San Mateo County

To have a general understanding of the suicide trends in San Mateo County, this section highlights suicide data categorized in four categories: (1) suicide deaths, (2) suicide attempts, (3) suicide ideation and (4) help-seeking.

The first three data categories include leading demographics that show which demographic groups constitute a high proportion of suicide deaths, attempts and ideation. While this information shows insightful trends, it doesn’t predict whether these specific demographic groups will engage in suicidal behavior.

Most of the data used below is from 2017 because this is the most current year of data available across all levels of suicide data. San Mateo County is working to improve data infrastructure so we have more timely and detailed data.

Here are the suicide trend data for San Mateo County:

**SUICIDE DEATHS**

- Suicide is the 14th leading cause of death in San Mateo County in 2017.
- 59 residents of San Mateo County died by suicide in 2017.
- The groups of people with these demographic characteristics appear to be at disproportionate risk of suicide death: White, male, single, 51-60 years age group and high school graduate/GED.
- The leading methods for San Mateo County suicide deaths in 2017 were firearm followed by hanging.
- The county suicide death rate (7.4 per 100,000 in 2015-2017) is lower than the state and national suicide death rate (10.4 per 100,000 in 2015-2017 and 14 per 100,000 in 1999-2017, respectively).
- San Mateo County ranks second to lowest county suicide death rate compared among all 58 counties in California. Santa Clara County has the lowest county suicide death rate.

**SUICIDE ATTEMPTS**

Please Note: While suicide attempt data is approximated by intentional self-harm, self-harm does not necessarily equate to suicide attempt.

- 346 emergency department visits were related to intentional self-harm in San Mateo County in 2017.
  - The groups of people with these demographic characteristics appear to be at disproportionate risk of emergency department visits related to intentional self-harm: White or Latinx, female, 15-24 years age group and residing in Mid-County.
  - In 2016-2018, the county emergency visit rate for adolescents (27.5 per 100,000) and adults (11.5 per 100,000) is lower than the state emergency visit rate for adolescents (40.3) and adults (18.5).
Suicide Trends in San Mateo County

- **360 hospital admissions were related to intentional self-harm** in San Mateo County in 2017
  - The groups of people with these demographic characteristics appear to be at disproportionate risk of hospital admissions visits related to intentional self-harm: **White, female, 15-24 years** age group and **residing in Mid-County**
  - In 2016-2018, the county hospitalization rate for adolescents (23.2 per 100,000) is higher than the state hospitalization rate for adolescents (12.9 per 100,000).
  - In 2016-2018, the county hospitalization for adults (9.8 per 100,000) is lower than the state hospitalization rate for adults (13.6 per 100,000).

**SUICIDE THOUGHTS**

- **9.5%** adults reported that they ever thought seriously about dying by suicide in 2017-2018 for San Mateo County residents.\(^\text{11}\)
  - The groups of adults in these age groups appear to be at disproportionate risk of suicide ideation: **25-44 years** (13.9%) followed by **18-24 years** (12.6%).
  - This percentage is lower than what adults reported in California overall in the same time period (12.5%)\(^\text{12}\)
- **13.4%** 9th grade students in San Mateo County in 2017-2018 reported that they seriously considered attempting suicide in the previous year.\(^\text{12}\)
  - The groups of 9th graders with these demographic characteristics appear to be at disproportionate risk of suicide ideation: **female** and **heterosexual**.
  - This percentage is lower than what 9th grade students reported in California overall in the same time period (16%)\(^\text{12}\)

**HELP-SEEKING**

- **5,684** calls from 650 area to Institute of Aging Friendship Line.\(^\text{13}\)
- **5,316** calls from 650 area code to National Suicide Prevention Lifeline.\(^\text{14}\)
- **9,629** calls to Star Vista Crisis Hotline.\(^\text{15}\)

While the data generally shows San Mateo County with lower rates of suicide behavior compared to the state and country, our county is committed to saving every life possible, including those groups that have a higher risk than the general county population. There is a need to enhance data collection and analysis to illustrate a more nuanced understanding of the specific demographic groups and factors that have a higher suicide risk.
Suicide Trends During COVID-19

With the ongoing pandemic, suicide prevention has been more important than ever in the United States, California and San Mateo County. Suicide deaths increased 32% from 2019 to 2020. The most common methods of death by suicide for 2020 were firearm and hanging. This is comparable to prior years. Suicide deaths by city are comparable for 2020 vs. 2019, except for an increase in Belmont where 8 deaths by suicide occurred in 2020 compared to less than 3 in 2019, and in Redwood City where 12 deaths occurred compared to 4 in 2019.

Deaths by Suicide by Year, San Mateo County, 2016-2020

Deaths by Suicide by Month, San Mateo County, 2019-2020

There was an increase in suicide deaths in San Mateo County in the months of January and February of 2020, prior to the full impact of COVID-19. There was a high number of suicide deaths in June 2020 as well, but in looking across the other years (data not shown), it is not unusual to have a one month spike occur.
**Deaths by Suicide by Age, San Mateo County, 2019-2020**

Suicide deaths by age group for 2020 are similar to 2019.

Suicide deaths by sex for 2020 are similar to 2019.

---

**Deaths by Suicide by Age, San Mateo County, 2019-2020**

Suicide deaths by age group for 2020 are similar to 2019.

---

**Deaths by Suicide by Sex, San Mateo County, 2019-2020**

Suicide deaths by sex for 2020 are similar to 2019.
Deaths by Suicide by Race/Ethnicity, San Mateo County, 2019-2020

Suicide deaths by race/ethnicity show an increase in 2020 for Asians, compared to 2019.

Deaths by Suicide by Birthplace, San Mateo County, 2019-2020

Suicide deaths by birthplace for 2020 show an increase amongst individuals born in a country other than the United States (36.7% in 2020 vs. 15.0% in 2019). No particular country stands out, although there are more from Asian countries (n=16) than other parts of the world.

If you know someone who is in suicidal crisis or emotional distress, please reach out for 24/7 Confidential Crisis Support
call 650-579-0350 or 1-800-273-8255
or text “BAY” to 741741
“One of the hardest experiences in my life was to choose life or death...I felt so alone during a time that I felt I should be happy...I wanted to die, and for the first time in my life...But the pain of not choosing my life and leaving my daughter to fend for life alone was even more terrifying. I Chose My Life”

– From the Choices photovoice by Desirae Miller, San Mateo
**Frameworks**

To address suicide prevention as a public health issue, San Mateo County Suicide Prevention Roadmap is guided by three frameworks:

1. **Social Ecological Model**\(^{16}\) – frames risk and protective factors of suicide
2. **Suicidal Crisis Path Model**\(^{17}\) – frames suicidal behavior
3. **Continuum of Interventions**\(^{18}\) – frames a continuum of interventions informed by suicidal behavior, risk factors and protective factors

Frameworks
### Risk Factors

**RELATIONSHIP**
- close relationships
  - Living in household with firearm
  - Exposure to suicide/contagion
  - Family violence
  - Family conflict
  - Family history of mental health condition
  - Family history of suicide/attempt
  - Relationship instability
  - Death of a loved one
  - Severing of romantic relationship
  - Social isolation/withdrawal
  - Combat exposure

### Protective Factors
- Presence of social support
- Use of social support
- Perceived social support
- Concerns suicide is harmful to child/family
- Sense of responsibility to family
- Healthy long-term committed relationship/marriage
- Help-seeking behavior
- Children present in the home
- Pregnancy
- Pulling together
- Caring letters
- Social connectedness
- Contact with caregivers
- Support for connection with healthcare providers
- Cognitive-behavioral therapy
- Dialectical-behavior therapy
- Collaborative assessment and management of suicide (CAMS)

SUICIDAL CRISIS PATH MODEL

In order to develop a comprehensive approach for suicide prevention it is important to understand the complexity of suicide. The Suicidal Crisis Path is a model that intends to integrate multiple theoretical approaches and frameworks within the context of an individual’s suicidal experience. In doing so, the purpose is to match intervention approaches with the timing, risk factors, and protective factors that would be the mechanisms to prevent a suicide from happening.

- **Stasis Level** – normal level of coping (varies by individual)
- **Higher Risk** – exposed to factors that lead to increased likelihood (but doesn’t necessarily cause) of suicidal behaviors below
- **Suicidal** – thinking about, considering or planning suicide
- **Suicide Attempt** – non-fatal attempt of suicide
- **Suicide** – death by suicide

CONTINUUM OF INTERVENTIONS

This framework is based on the mental health intervention spectrum for mental health conditions in the National Academy of Science publication *Reducing Risks for Mental Disorders: Frontiers for Preventive Intervention Research*. The framework has been adapted to better apply to the unique nature of suicide prevention. For this Continuum of Interventions, there are a few things to consider when reviewing the below intervention definitions: (1) definitions of these five types of interventions vary across the suicide prevention field (there are no precise definitions), (2) types of interventions overlap on a continuum (there are no clear boundaries) and (3) the below working definitions are used to inform this plan.

- **Promotion** – interventions that increase suicide protective factors and reduce suicide risk factors to advance resilience and well-being
- **Prevention** – interventions that prevent suicidal behavior
- **Early Intervention** – interventions that detect early signs or symptoms of suicidal behavior
- **Intervention** – interventions that address existing suicidal behavior
- **Postvention** – interventions that address/prevent suicidal behavior among suicide loss survivors after a suicide death
“After looking up the suicide hotline number, she grabbed a pen and quickly wrote a note on a piece of scratch paper and folded it into an airplane. She threw it out the window and prayed that it would work...He reads the tiny note on the airplane...he draws a smiley face on the paper, and with a small flick of the wrist, the paper airplane went flying back.”

– From *The Paper Airplane* short story by Mia Hua, Redwood City
Strategic Aims & Goals

San Mateo County’s Suicide Prevention Roadmap aligns with and builds off of the four strategic aims and twelve goals outlined in California’s Strategic Plan for Suicide Prevention 2020-2025. These strategic aims and goals are based on current suicide prevention best practices and intended to empower local partners.

San Mateo County’s Suicide Prevention Roadmap consists of four strategic aims and thirteen goals. Each goal includes the following components:

- **Rationale** – based on data when available, including qualitative data (e.g. stakeholder surveys, forum discussions and public comment) and quantitative data (e.g. death, attempt, thoughts, protective factor, risk factor and help-seeking data).

- **Long-Term Outcome** – measurable targets that may be directly or indirectly from implementation of objectives and anticipated to take longer than five years to achieve; often based on qualitative data.

- **Equity Focus** – equity-centered action that aims to improve outcomes for historically marginalized communities.

- **Current Efforts** – program or activity that is currently advancing this specific goal.

- **Objectives** – program or activity intended to advance this specific goal.

---

Dear Fatako,

I am more than just your student; I am a whole person with struggles and challenges. I ask for your compassion when times are rough.

Photo from the Pacific Islander Initiative Suicide Prevention Resource Card series. Learn more at smchealth.org/pacific-islander-initiative.
To address this complex public health issue, San Mateo County needs a variety of key action partners to dedicate people, funding, data and work around suicide prevention.

The San Mateo County Suicide Prevention Committee (SPC) is a coalition that consists of many of the above key partners who are already doing impactful suicide prevention work. The SPC will continue fostering further collaboration to implement this Roadmap. For more information about the SPC, please see Appendix A: About Suicide Prevention Committee or visit www.smchealth.org/SuicidePrevention.
STRATEGIC AIM 1: Establish a Suicide Prevention Infrastructure

GOAL 1: Enhance Visible Leadership and Networked Partnerships

Rationale

• Suicide is a local public health priority as the 14th leading cause of death in San Mateo County in 2017.\(^{22}\)
• Suicide prevention requires a diversity of partners since suicide is attributed to various factors at the individual, relationship, community and society levels.\(^{23}\)

Long-Term Outcome
Increased commitment and sustainability of suicide as a preventable public health priority across diverse partners.

Equity Focus
Ensure that Suicide Prevention Committee represents the diverse demographic of the San Mateo County community, at least in terms of race/ethnicity, language, gender identity, sexual identity, age, birthplace and city.

Current Efforts\(^{24}\)

Since 2010, San Mateo County has had a suicide prevention coalition — the Suicide Prevention Committee — that is open to community partners and community members. The Suicide Prevention Committee is dedicated to the mission of providing oversight and direction to suicide prevention efforts in San Mateo County.

• Suicide Prevention Committee For details of above program/activity, please see Appendix A: About Suicide Prevention Committee.

Objectives

Objective 1a | Enhance Coalition: Suicide Prevention Committee will provide strategic guidance, technical assistance, data monitoring, countywide evaluation, information dissemination and other infrastructure to local partners.

Objective 1b | Build Networked Partnerships: Recruit a diversity of action partners who can champion suicide prevention as a public health priority. Provide capacity building and workgroup opportunities to align goals, expertise and resources among partners.
GOAL 2: Increase Development and Coordination of Suicide Prevention Resources

Rationale

- Stakeholder feedback identified coordination of resources as the 2nd highest priority goal of the 12 goals identified by the California’s Strategic Plan for Suicide Prevention 2020-2025.
- National and state strategic plans prioritize coordination of suicide prevention resources across all sectors in a community (not just among behavioral health organizations).25-26

Long-Term Outcome

Increase in coordination and integration of suicide prevention resources through planning and collaboration across diverse partners and systems.

Equity Focus

Identify strategies to systematically improve community reach of suicide prevention resources to diverse communities in San Mateo County, at least in terms of race/ethnicity, language, gender identity, sexual identity, age, birthplace and city.

Current Efforts

To enhance the development, coordination and integration of suicide prevention resources, the Suicide Prevention Committee developed, facilitated implementation and monitored progress of San Mateo County’s first suicide prevention strategic plan — called the 2017-2020 Suicide Prevention Roadmap.

- Suicide Prevention Committee
- 2017-2020 Suicide Prevention Roadmap

For details of above program/activity, please see Appendix A: About Suicide Prevention Committee and Appendix B: 2017-2020 Roadmap & Progress.

Objectives

Objective 2a | Develop Implementation Strategy: Develop an implementation strategy and action plan.

Objective 2b | Map Partners & Resources: Map partners and assets across sectors to coordinate priorities, roles & responsibilities, funding, data and other resources.

Objective 2c | Develop Return on Investment Data: Develop data that demonstrates how investments in specific suicide prevention strategies could lead to improved outcomes and cost savings in other areas, such as emergency services and healthcare.

Objective 2d | Integrate Strategies into Existing Services: Integrate suicide prevention strategies into existing services being delivered through local settings, systems, and programs.

Objective 2e | Establish Formal Partnerships: Establish formal partnerships to foster communication, information sharing and coordination (e.g. MOU)
GOAL 3: Advance Data Monitoring and Evaluation

Rationale

- Data monitoring and evaluation is essential to identify protective factors and risk factors at an individual, relationship, community and society level.
- Data and evaluation-based needs can better inform and tailor suicide prevention interventions.

Long-Term Outcome

Increase in the use of standardized data to guide suicide prevention local policy and planning, resource management, and investment.

Equity Focus

Advance suicide data collection that yields disaggregated data and more equitable data analysis for various marginalized communities.

Photo from the Pacific Islander Initiative Suicide Prevention Resource Card series. Learn more at smchealth.org/pacific-islander-initiative.
Current Efforts

A variety of organizations and tools provide San Mateo County-specific data on suicide deaths, suicide attempts, suicide ideation, suicide risk/protective factors and help-seeking. This local data provides insights on who and what to focus on for suicide prevention interventions.

- All Together Better Health Data Portal
- Behavioral Health Case Review
- California EpiCenter
- California Health Interview Survey
- California Healthy Kids Survey
- California Measurements, Outcomes, and Quality Assessment
- California Office of Statewide Health Planning & Development – Emergency Department and Hospitalization Data
- California Peer-Run Warmline
- California Vital Records Business Intelligence System – Mortality Data
- Caltrain – Fatality Statistics
- Child Death Review Team
- Community Stigma Baseline Survey
- Coroner’s Office - Suicide Consolidated Risk Assessment Profile
- County Office of Education Suicide Prevention School Protocol – Documentation of Risk Assessment
- Domestic Violence Death Review Team
- Elder Death Review Team
- Health & Quality of Life Survey
- Institute on Aging Friendship Line
- National Suicide Prevention Lifeline
- Star Vista’s Crisis Intervention & Suicide Prevention Center – Hotline

For details of above program/activity, please see Appendix E: Suicide Prevention Data in San Mateo County and/or Appendix F: Suicide Prevention Resources in San Mateo County.
Objectives

Objective 3a | Analyze and Use Suicide Data: Use suicide death, attempt and ideation data to evaluate the proportion of suicidal behavior that results in death. The results should be used to identify high-risk groups, target them with selective prevention strategies, and focus resources on specific lethal means restriction strategies.

Objective 3b | Update Suicide Consolidated Risk Assessment Profile: The Coroner’s Office and Suicide Prevention Committee can work together to update San Mateo County’s version of the Suicide Consolidated Risk Assessment Profile.

Objective 3c | Add Suicidality Question(s) to Health & Quality of Life Survey: Develop and propose suicidality question(s) to be added to San Mateo County’s Health and Quality of Life Survey. Prioritize suicide ideation question that aligns with California Health Interview Survey. The addition of this question can help correlate suicide ideation with other risk and protective factors.

Objective 3d | Disseminate Suicide Prevention Participant and Program Evaluation Templates: Disseminate suicide prevention participant and program evaluation templates created by the statewide effort called MOQA (Measurements, Outcomes, and Quality Assessment).

Objective 3e | Disseminate Best Practices: Disseminate effective suicide prevention best practices shared by leading suicide prevention organizations and researchers. Best practices could cover topic areas such as communications, training, treatment and community-based programs. For community-based suicide prevention efforts, our local communities can refer to national guidelines on how to implement effective and comprehensive community-based suicide prevention programs.

Objective 3f | Explore Partnerships with Colleges/Universities: Build relationships with local colleges and universities and identify capacity for research to support local and state suicide prevention goals.
GOAL 4: Create Safe Environments by Reducing Access to Lethal Means

Rationale

- As is across the United States and California, in San Mateo County, suicide deaths are attributed to more lethal means such as firearm and hanging.\cite{30}
- Research studies have suggested that lethal means restriction leads to reduced suicide rates due to that method and reduced overall suicide rates.\cite{31}

Long-Term Outcome

Decrease in suicide deaths and attempts, including those attributed to lethal means.

Equity Focus

Ensure warning signs and labels are available in San Mateo County’s threshold languages.

Current Efforts\cite{32}

San Mateo County has a variety of past and ongoing efforts that aim to reduce access to lethal means, including firearms, medication and trains.

- Anonymous Gun Buyback
- Caltrain – Rail Safety and Suicide Prevention Activities
- Gun Violence Restraining Order
- Moms Demand Action
- Safe Waste Disposal of Medicine
- San Mateo County Sheriff’s Office Firearm Destruction

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.
Objectives

Objective 4a | Use Suicide Data to Tailor Means Restriction Strategies: Identify the methods of suicidal behavior (death and attempt) used by community members and by specific demographic and cultural groups (such as race/ethnicity, language, age, sexual orientation, and gender identity) to guide development of tailored means restriction strategies and evaluate impact.

Objective 4b | Create Suicide Prevention Data Collection & Reporting Agreements: Create agreements among local bridge and rail authorities, first responders, and crisis services providers to collect data documenting events in which people were prevented from making a suicide attempt (i.e. jumping), any services they received and the outcomes. Include reporting requirements, such as biannual or quarterly reports.

Objective 4c | Disseminate Suicide Prevention Information to Gun Shop & Range Owners: Disseminate information to local gun shop and range owners to increase awareness in the firearm owning community about suicide warning signs, how to intervene, and available resources.

Objective 4d | Incorporate Suicide Prevention in Firearm Safety Trainings: Partner with local firearm safety trainers to incorporate firearm suicide prevention education into trainings.

Objective 4e | Disseminate Information About Lawful Firearm Transfer/Storage During Suicide Crisis: Partner with law enforcement, family members and other key partners to guide dissemination of lawful options for temporarily transferring firearms for storage in times of suicide crisis or when Gun Violence Restraining Orders apply.

Objective 4f | Promote Safe Medicine Disposal and Suicide Prevention: Promote safe medication disposal methods in the community or through pharmacies and other health care providers and partner with local pharmacies to highlight suicide and overdose prevention resources for people filling prescriptions.

Objective 4g | Promote Overdose Prevention Information: Disseminate information through local health departments to community partners about available overdose prevention resources, methods, and medications to counteract overdose.

Objective 4h | Advance Policies to Reduce Excessive Alcohol Use: Partner with alcohol and other drug prevention experts on what and where local community-based policies can be implemented, including zoning laws (density of alcohol vendors), taxes and bans.

Objective 4i | Address Site-Specific Suicides: Convene with regional and local partners to (1) identify specific sites in the community frequently used for suicide, or those that provide opportunity for suicide, (2) consider the benefits and risks of installing signs that list crisis services resources and provide positive, life-affirming messages and (3) develop plans, identify funding for and implement plans to construct barriers to prevent suicide at those identified sites.
GOAL 5: Empower People, Families and Communities to Reach Out for Help When Mental Health and Substance Misuse Needs Emerge

Rationale

- Stakeholder feedback identified Goal 5 as the top priority of the 12 goals identified by the California’s Strategic Plan for Suicide Prevention 2020-2025.
- Appropriate, timely and accessible mental health and substance use needs services have the potential to prevent suicide. Best practices include insurance coverage policies, telehealth health system changes and peer norm programs in school or workplace settings.

Long-Term Outcome

Increase mental health and substance use service utilization and reduce unmet behavioral health needs as assessed by the California Health Interview Survey.

Equity Focus

Recruit and support career pipeline of peer workers that represents demographic of the San Mateo County community, at least in terms of race/ethnicity, language, gender identity, sexual identity, age, birthplace and city.

Current Efforts

San Mateo County has many resources that empower our community to reach out for behavioral health (mental health and substance use) services. Specifically, these resources offer diverse types of services, including resiliency building, outreach and engagement, education and awareness, and peer support.

- #BeTheOneSMC Campaign
- Assisted Outpatient Treatment
- California Clubhouse
- California Directing Change Program & Film Contest
- Cannabis Decoded Campaign
- East Palo Alto Partnership for Mental Health Outreach
- Family Assertive Support Team
- Health Ambassador Program - Adult
- Health Ambassador Program – Youth
- Health Equity Initiatives
- Heart & Soul, Inc.
- Help @ Hand Technology Suite Collaborative
- Helping Our Peers Emerge
- Mental Health First Aid – Adult and Youth
- Mental Health Month
- National Alliance on Mental Illness San Mateo County
• North County Outreach Collaborative
• Office of Consumer & Family Affairs
• Onyourmind.net
• Parent Project
• Peninsula Conflict Resolution Center
• Peninsula Family Services – Senior Peer Counseling
• Pride Center
• Recovery Month
• Star Vista’s Crisis Intervention & Suicide Prevention Center
• Success for Youth and Schools through Trauma Informed & Equitable Modules Support
• Suicide Prevention Month
• Voices of Recovery San Mateo County

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.

🔗 Objectives

**Objective 5a | Expand Resilience Building Services:** Expand community-based services for managing stressors, increasing life skills and building resiliency, which may include coping skills, critical thinking, stress management, mindfulness practices, conflict resolution, and problem-solving skills. Tailor activities based on community needs, age group, culture, language and setting.

**Objective 5b | Expand Outreach & Engagement Strategies:** Expand outreach and engagement strategies to promote behavioral health and community services and resources. Identify barriers that community members face in seeking services for behavioral health needs. Develop strategies to make services more accessible, convenient, and culturally & linguistically responsive to increase the likelihood people will pursue and stay connected to such services.

**Objective 5c | Coordinate Collaborative Awareness Campaigns:** Partner with community organizations and businesses to expand awareness of suicide warning signs and prevention resources. Coordinate suicide prevention awareness campaigns with other social marketing campaigns designed to reduce mental health stigma and discrimination and reduce relevant public safety threats, such as misuse of medication or unsafe gun storage practices. Target audiences could be at a population-level or specific population disproportionately impacted by suicide. Targeted campaigns should be culturally and linguistically adapted.

**Objective 5d | Increase Mental Health Literacy:** Expand services to increase mental health literacy across the lifespan and in a variety of languages, encourage people to seek help for health, mental health, and substance use needs, and promote messages that reduce stigma and spread messages of hope that lives can be saved from suicide.

**Objective 5e | Develop Peer Support Network:** Develop a network of peer support providers to help people navigate health, mental health, and substance use care systems. Create a transparent feedback loop to encourage peer support providers to identify ways health, mental health, and substance use systems can be more responsive to people at risk for suicide.
GOAL 6: Increase Connectedness Between People, Family Members, and Community

Rationale

- Stakeholder feedback as the 3rd highest priority goal of the 12 goals identified by the California’s Strategic Plan for Suicide Prevention 2020-2025.
- Numerous risk and protective factors are related to connectedness at various levels of social ecology, including connectedness between individuals, between individuals and families and among community organizations and social institutions.39

Long-Term Outcome

- Increase in reported connectedness among public school students in grades 7, 9, and 11 as assessed by the California Healthy Kids Survey.
- Increase in reported connectedness among adults as assessed by the below indicators from the San Mateo County Health & Quality of Life Survey.

Equity Focus

Ensure connectedness programs reach all communities in San Mateo County and address any relevant systemic barriers.

Current Efforts

While current efforts of Goal 5 and 6 overlap, current efforts for goal 6 focus on the connectedness between people (versus people and behavioral health services). Specifically, these resources offer diverse types of programs, including positive attachments, social supports, social emotional learning, behavioral health inclusion, violence prevention, volunteerism and civic engagement.

- #BeTheOneSMC Campaign
- California Clubhouse
- California Directing Change Program & Film Contest
- Health Ambassador Program - Adult
- Health Ambassador Program – Youth
- Health Equity Initiatives
- Heart & Soul, Inc.
- Mental Health Month
- National Alliance on Mental Illness San Mateo County
- Office of Consumer & Family Affairs – Lived Experience Academy and Lived Experience Education Workgroup
- Office of Education Safe and Supportive Schools
- Onyourmind.net
- Parent Project
• Peninsula Conflict Resolution Center
• Pride Center
• Recovery Month
• Star Vista’s Crisis Intervention & Suicide Prevention Center
• Success for Youth and Schools through Trauma Informed & Equitable Modules Support
• Suicide Prevention Month
• Voices of Recovery San Mateo County

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.

🌟 Objectives

Objective 6a | Increase Services to Build Positive Attachments and Social Supports: Increase services intended to build positive attachments between children, youth, their families, other adults, and social supports in their community to increase a sense of belonging, strengthen a sense of identity and personal worth, and provide access to larger sources of support. Social support can be found in schools, faith-based communities, cultural centers, and other community-based organizations. Tailor strategies to be responsive to needs based on age, language and culture.

Objective 6c | Promote Inclusive Culture Around Behavioral Health: Promote a culture free of stigma and discrimination by allowing for an open dialogue about mental health and mental health resources, and by delivering supportive messages of hope and recovery for people with mental health and substance use issues. Establish policies and methods for enforcement to create cultures that support healthy lifestyles and environments that are affirmative and that prevent violence, including bullying and discrimination.

Objective 6d | Consider Suicide Prevention Strategies to Integrate in Violence Prevention Services: Identify opportunities to integrate suicide prevention strategies into services intended to reduce other forms of violence, such as child abuse, elder abuse and domestic violence. These forms of violence may share risk and protective factors with suicidal behavior.

Objective 6e | Promote Volunteerism: Partner with community-based organizations to build and promote opportunities for volunteerism to increase connectedness and a sense of purpose.

Objective 6f | Support Civic Engagement: Build capacity of local residents to help build local leadership that is representative of community demographics. Empower residents to be involved in decision-making and civic engagement.
GOAL 7: Increase the Use of Best Practices for Reporting Suicide and Promote Healthy Use of Social Media and Technology

Rationale
• Research has shown that certain types of public messaging about suicide can increase risk factors for suicide while other types of suicide-related public messaging can increase protective factors for suicide and reduce risk.41-42

Long-Term Outcome
Reduce suicide contagion among the general population, including suicide clusters (when multiple suicides occur within a particular time period or location, especially among youth).

Equity Focus
Disseminate safe messaging best practices through media outlets commonly used by marginalized communities, including communities of color, youth, older adults, and LGBTQ+ communities.

Current Efforts
San Mateo County uses safe messaging best practices for public campaigns and is working with partners, particularly Caltrain, to use safe messaging best practices for public campaigns, postvention and reporting.
• #BeTheOneSMC Campaign
• Caltrain - Rail Safety and Suicide Prevention Activities
For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.

Photo from the Pacific Islander Initiative Suicide Prevention Resource Card series. Learn more at smchealth.org/pacific-islander-initiative.
Strategic Aims & Goals

Objectives

Objective 7a | Create Postvention Communication Strategies: Minimize the circulation of misinformation by creating communication strategies for use in the event of a suicide — including pre-existing agreements with partners. Include a formal strategy for managing information on the most used social media sites and monitor social media posts by others related to the suicide death.

Objective 7b | Disseminate Suicide Safe Reporting/Messaging Guidelines: Disseminate information and/or deliver training on best practices guidelines for suicide reporting/messaging to media, entertainment and communication partners.

Objective 7c | Disseminate Suicide Safe Social Media Posting Guidelines: Disseminate information about how suicide risk can effectively be expressed by people on various social media sites and highlight social media resources for identifying and reporting concerns about content.

Objective 7d | Share Best Practices for Healthy Social Media Use: Integrate into public campaigns, and health and mental health curriculum in schools’ best practices for developing healthy social media habits and using social media in a way that promotes connectedness to reduce isolation.

Objective 7e | Disseminate Information to Encourage Help-Seeking: Partner with media, entertainment and communication partners to disseminate information about resources, encourage people to seek help for mental health needs and substance use, and reduce stigma and discrimination that may prevent people from accessing services and supports. Share best practices and resources on how to disseminate such information in culturally and linguistically appropriate ways.
GOAL 8: Strengthen Economic Supports

Rationale

- Suicide risk has been linked to the below protective factors. While more research is needed to understand the relationship between economic factors and suicide risk, current evidence suggests that strengthening economic supports may be an important protective factor.
  - Healthy economy
  - Minimum wage increase
- Centers for Disease Control and Prevention’s “Preventing Suicide: A Technical Package of Policy, Programs, and Practices” highlights two specific best practices for strengthening economic support to prevent suicide:
  - Strengthen household financial security
  - Advance household stabilization policies

Long-Term Outcome

Increase in household income and financial security, decrease in personal debt, decrease in foreclosure/eviction rates and decrease in suicide rates in San Mateo County.

Equity Focus

Work with Economic Supports partners to support communities disproportionately affected by financial insecurity and unstable housing in San Mateo County.

Current Efforts

There are a variety of efforts advancing economic supports for the San Mateo County community, including those specifically for strengthening household financial security and housing stabilization policies. Some programs are directly linked with behavioral health services while other programs are not.

- Community Care Settings Program
- Get Healthy San Mateo County - Healthy Economy and Healthy Housing Priorities
- Housing Leadership Council
- Housing Assistance for People with HIV/AIDS - Mental Health Association of San Mateo County
- Home for All Initiative
- People’s Alliance of San Mateo County
- Recovery Initiative – Economic Prosperity Workgroup
- Whole Person Care

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.
**Objectives**

**Objective 8a | Strengthen Household Financial Security:** Partner with existing efforts to build financial security of San Mateo County residents, including (but not limited to) accessing livable wages, medical benefits, child care benefits, paid sick days, retirement, disability insurance, unemployment benefits, financial services, job training and job placement.

**Objective 8b | Advance Housing Stabilization Policies:** Partner with existing efforts to advance housing stabilization policies, including (but not limited to) programs that help promote affordable and stable housing options and reduce foreclosures and evictions.
GOAL 9: Increase Detection and Screening to Connect People to Services

Rationale

• Among several expert panels and task forces, there is general agreement that suicide screening and assessment is useful when conducted by trained practitioners and embedded in a more comprehensive mental health evaluation and treatment program.49

Long-Term Outcome

Decrease in suicidal thoughts and behaviors and increase in connection to appropriate level of services based on risk.

Equity Focus

Assess whether gatekeeper trainings and assessment/screening tools are culturally responsive or adaptable to different cultural groups.

Current Efforts50

San Mateo County has a variety of programs that can help screen and refer those at risk of suicide, including gatekeeper trainings, call centers and coordinated teams.

• ACCESS Call Center
• Applied Suicide Intervention Skills Training
• Be Sensitive Be Brave Suicide Prevention
• Crisis Intervention Training
• Family Assertive Support Team
• Mental Health Assessment and Referral Team
• Mental Health First Aid – Adult and Youth
• Onyourmind.net
• Psychiatric Emergency Response Team
• Question Persuade Refer
• Reconozca Las Señales Workshop
• Star Vista’s Crisis Intervention & Suicide Prevention Center
• Veterans Affairs Suicide Prevention Gatekeeper Training

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.

Objectives

Objective 9a | Expand Delivery of Suicide Prevention Gatekeeper Trainings: Expand delivery of suicide prevention trainings to people who are in positions to identify warning signs of suicide and refer those at risk to mental health and substance use services and culturally appropriate supports.
- Offer training programs that vary by intensity to meet varied roles and availability.
- Offer training programs that are culturally and linguistically relevant, including those targeting specific high-risk populations.
- Provide people the opportunity to reinforce knowledge and skills acquired during training through periodic booster sessions.
- Build capacity and sustainability for suicide prevention training across systems using train-the-trainer models or evidence-based online trainings.

Objective 9b | Train First Responders on Suicide Screenings & Intervention: Train first responders on how to identify warning signs, screen for level of suicide risk, use de-escalation techniques and triage to those at risk of suicide to appropriate level of support.

Objective 9c | Enhance Suicide Screenings & Assessment in Various Settings:
- Screen people for suicide risk in various settings, including health, correctional, workplace and school settings.
- Suicide screenings can follow positive results on other behavioral health screening tools.
- Integrate best practices in suicide risk assessment and management in various settings and workflows.
- Create uniform policies and procedures to make screening, assessments, and decision-making consistent across fields. Clarify billing methods for services.

Objective 9d | Train Community-Based Partners on Suicide Screenings: Deliver training to community-based partners on how to conduct suicide screening that can identify suicide risk and refer to further suicide risk assessment when needed.
GOAL 10: Deliver a Continuum of Crisis Services

**Rationale**
- Tiered crisis services to address various levels of suicide risk and provide referral to appropriate level of care have been shown to be effective in reducing risk.
- Current research on crisis services indicates that crisis stabilization, community-based residential crisis care, and mobile crisis services can redirect individuals from unnecessary hospitalizations and connect individuals with the least restrictive treatment. There is also research suggesting that a continuum of crisis services can reduce the costs of psychiatric hospitalization without negatively impacting clinical outcomes.51

**Long-Term Outcome**
Increase in linkage to community-based services for people experiencing suicidal behavior and their families and caregivers by providing a variety of tiered resources to provide the appropriate level of care.

**Equity Focus**
Recruit and support career pipeline for crisis service providers that reflect the linguistic and cultural diversity of our communities.

**Current Efforts**52
San Mateo County has multiple programs that can appropriately address and refer various levels of suicide risk. Many of these programs involve a coordinated effort with crisis providers in diverse community settings.
- ACCESS Call Center
- Assisted Outpatient Treatment
- Crisis Services
- Crisis Intervention Training
- Family Assertive Support Team
- Mental Health Assessment and Referral Team
- Office of Education Suicide Prevention School Protocol
- Onyourmind.net
- Psychiatric Emergency Response Team
- Star Vista’s Crisis Intervention & Suicide Prevention Center

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.
Objectives

Objective 10a | Map and Promote Continuum of Crisis Services: Evaluate the continuum of crisis services available through private and public resources and identify gaps in the continuum (and potential funding sources to address those gaps). Promote the use of tiered crisis to provide appropriate level of care and in the least restrictive setting.

Objective 10b | Deliver Suicide Prevention Trainings to Crisis Service Providers: Deliver suicide prevention training to crisis service providers, including crisis hotline and warm line numbers.

Objective 10c | Disseminate Crisis Resources to Health Partners: Disseminate information on available crisis service resources to health, mental health, and substance use care partners. Encourage these partners to include crisis services in safety plans developed through an alliance between partners and people at risk.

Objective 10d | Create Formal Agreements Between Organizations to Facilitate Follow Up Care: Create memorandums of understanding between systems of care and community-based crisis services to provide follow-up for people transitioning out of care systems or touched any part of the care system, including protocols for protecting the confidentiality of people at risk. Health, mental health, and substance use care systems should have protocols in place for obtaining consent for follow-up care from people at risk. To coordinate efforts, document clear methods of communication between crisis service providers and other systems, such as community corrections, child welfare, and veterans’ services.

Photo from the Pacific Islander Initiative Suicide Prevention Resource Card series. Learn more at smchealth.org/pacific-islander-initiative.
GOAL 11: Deliver Best Practices in Care Targeting Suicide Risk

Rationale

- Various health care systems have implemented system-wide suicide prevention best practices that have been associated with reduction of suicide deaths or improved health outcomes of patients with high suicide risk.53

Long-Term Outcome

Decrease in suicidal attempt as approximately measured by intentional self-harm data reported by hospitals.

Equity Focus

Recruit and support career pipeline for health providers that reflect the linguistic and cultural diversity of our communities.

Photo from the Pacific Islander Initiative Suicide Prevention Resource Card series. Learn more at smchealth.org/pacific-islander-initiative.
Current Efforts
San Mateo County has well established and innovative programs designed to improve various parts of the behavioral health system and improve patient outcomes for those most in need.

- Helping Our Peers Emerge
- Integrated Medical Assisted Treatment Program
- Psychiatric Emergency Services
- Whole Person Care

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.

Objectives

Objective 11a | Enhance Suicide Treatment via Telehealth and Telemedicine: Expand the use of telehealth and telemedicine providers with training in best practices for suicide-related treatment - especially in rural communities - to enhance timely access to care targeting suicide risk.

Objective 11b | Promote and Build Capacity for Effective Use of Electronically Accessible Safety Plans: Promote safety planning by prompting health, mental health, and substance use service providers to record safety plans in electronic medical record systems and by making plans accessible to people via commonly used portals. Build provider’s capacity to effectively implement safety plans through trainings and/or consultations.

Objective 11c | Implement Trainings and Expand Capacity of Mental Health Providers for Suicide Treatment: Consider various evidence-based training modules on ongoing suicide care and management. Train mental health professionals in providing ongoing care for those with suicidal ideation or risk. Create a system that confirms competency or appropriate level of training for suicide treatment.

Objective 11d | Create Directory for Suicide Treatment Providers: Create a local online, public directory that lists providers delivering suicide-related treatment and services, information about insurance eligibility, language proficiencies, and criteria for new clients.

Objective 11e | Enhance Services and Supports to Caregivers: Partner with health, mental health, and substance use care systems and providers to improve delivery of services and supports to caregivers and family members of people transitioning from care settings following services for suicidal thoughts or behaviors. The efforts should prioritize safety and address service gaps. People at risk should be key decision-makers in defining support networks and the role each member of the network plays in creating safety and recovery.

Objective 11f | Educate Caregivers on How to Provide Ongoing Support to Those with Suicidal Risk: Disseminate information to caregivers and family members on how to support a person at risk by serving as a resource identified by the person in safety planning; how to reduce environmental safety risks by promoting means safety, especially at home; and how to help manage harmful behaviors stemming from underlying health, mental health, and substance use needs, such as escalating alcohol or drug use.
GOAL 12: Ensure Continuity of Care and Follow-up After Suicide-related Services

Rationale

- There is substantial research that patients discharged from various treatment settings are of high risk of suicide, including discharge from inpatient psychiatric units, emergency departments and residential addiction treatment.55,56,57
- Proactive follow up and active engagement strategies have been associated with reduced suicide deaths and attempts.58-59

Long-Term Outcome

Reduce subsequent suicidal behavior among people discharged from emergency departments and hospital settings after suicide-related services.

Equity Focus

Enhance discharge transition for those disproportionately admitted to the emergency room or hospital after suicide attempts, including youth and Latinx communities.

Current Efforts60

San Mateo County has various programs that provide follow up care after an individual has been discharged from care or has received any type of support for suicidal behavior.

- Helping Our Peers Emerge
- Psychiatric Emergency Services
- Serenity House
- Whole Person Care
- Youth Case Management
- Youth to Adult Transition Program

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.
Objectives

Objective 12a | **Enhance Documentation and Information Sharing After Suicide Ideation/Attempt:**
Increase the use of electronic health records to document a person’s safe transition to another provider, and ensure life-saving information is transmitted while protecting the person’s privacy.

Objective 12b | **Facilitate Safe and Timely Care Transitions:** Facilitate safe and timely care transitions by providing linkages to culturally and linguistically appropriate outpatient mental health and substance use service providers, crisis services, safety planning or crisis response planning, and by reducing access to lethal means.

Objective 12c | **Disseminate Safe Discharge Best Practices to Emergency Departments:** Disseminate to emergency department administrators the Caring for Adult Patients with Suicide Risk: A Consensus Guide for Emergency Departments and Quick Guide for Clinicians to increase awareness of safe discharge practices for people seen for suicide-related services.

Objective 12d | **Create Uniform Policies and Protocols for Lethal Means Counseling:** Create uniform protocols for counseling people discharged from emergency departments and hospitals after receiving suicide-related services on restricting access to lethal means. Families and caregivers should be included in such counseling.

Objective 12e | **Educate and Train Health Providers on Lethal Means Counseling:**
- Disseminate information on lethal means counseling to health providers, including health and behavioral health settings.
- Prioritize providers who predominantly serve at risk-groups or work in high-risk settings, such as emergency departments.
- Promote free online training, such as Counseling on Access to Lethal Means available at https://training.sprc.org/, and the use of online toolkits, such as https://health.ucdavis.edu/what-you-can-do/.
- Train health care providers to deliver lethal means counseling to family members and caregivers supporting people who are discharged from a health care setting after suicidal behavior.

Objective 12f | **Create Uniform Policies and Procedures for Safe Transition:** Create uniform policies and procedures for safely transitioning people or students back into the workforce and home or school following a suicide attempt, suicide, or hospitalization for a mental health crisis.
- Create uniform policies and protocols to support health, mental health, and substance use service providers in the creation or revision of safety plans for persons at risk.
- Examples include uniform procedures for establishing a connection between the person and a new provider; policies ensuring timely delivery of information to the new provider; and policies addressing the importance of follow-up within 24 to 48 hours of the transition.
- Create memorandums of understanding among local crisis service providers to establish relationships with people prior to discharge and ensure follow-up after discharge.

Objective 12g | **Create Uniform Policies & Procedures After Release from Correctional Settings:** Create uniform policies and procedures to connect people released from correctional settings who have been identified as at risk for suicide, or who were receiving suicide-related services in custody, to appropriate services in the community. Include a standardized process for transferring confidential data and information.
GOAL 13: Expand Support Services Following a Suicide Loss

**Rationale**
- Research suggests that exposure to a suicide death can increase the suicide risk to those who are bereaved by suicide.63
- National guidelines recommend addressing the needs of those bereaved by suicide to reduce their risk and negative effects of suicide.64

**Long-Term Outcome**
Reduce the amount of time between a suicide loss and access to bereavement services specifically designed to meet the needs of suicide loss survivors.

**Equity Focus**
Diversify cultural healing grief rituals and practices.

**Current Efforts**65
Mission Hospice and Home Care provide the only suicide prevention suicide loss support group based in San Mateo County. While based in San Mateo County, Kara also offers grief support to those in San Mateo County. Both Mission Hospice and Kara offer a variety of grief support services. Star Vista provides a 24/7 crisis hotline for a person or a person helping someone at-risk of suicide, including those bereaved or exposed by suicide.

- Kara Grief – Suicide Survivor Support Group
- Mission Hospice & Home Care – Suicide Loss Support Group
- Star Vista’s Crisis Intervention & Suicide Prevention Center

For details of above program/activity, please see Appendix F: Suicide Prevention Resources in San Mateo County.
Objectives

Objective 13a | Develop Integrated Postvention Services Plan: Develop an integrated postvention services plan to guide delivery of best practices following a suicide loss.

- Tailor strategies to settings and cultures.
- Identify a lead agency or organization responsible for ensuring adequate capacity, training, and effectiveness in the delivery of activities that support family and friends, service providers, and community members after a suicide loss.
- Enter into agreements that contain clearly defined roles and procedures to increase the effectiveness of coordinated responses, such as procedures for sharing private information and data based on the role of each provider.

Objective 13b | Provide Postvention Training to Service Providers: Provide training to first responders, crisis service providers, and access line responders on best practices in supporting suicide loss survivors, from understanding their unique needs to helping them access resources.

Objective 13c | Develop Online Bereavement Toolkit: Develop and disseminate an online bereavement toolkit consisting of community-specific resources.

Objective 13d | Expand Capacity of Suicide Loss Support Programs: Expand capacity and sustainability of existing suicide bereavement support programs using Pathways to Purpose and Hope Guide. Consider Local Outreach to Suicide Survivors (LOSS) Team program modeled by Tulare County.

Objective 13e | Expand Peer-Led Suicide Loss Support Programs: Expand support services designed and facilitated by survivors of suicide loss. Provide training for suicide loss survivor service facilitators of diverse backgrounds, cultures and languages. Create opportunities for service facilitators to support each other, including group debrief sessions.
“Don’t be frightened, and don’t be shy. Pick up the phone and let a friend try, to show you the path to recovery and light. It may be hard but you will be alright. Others will help you and not let you fall, Because **Your Life is Precious to Us All**”

— From the *HELP* poem by Ellen Darnell, Redwood City
After the creation and dissemination of this 2021-2026 San Mateo County Suicide Prevention Roadmap, the next steps include the following:

1. **Recruit Key Action Partners and Build Coalition**: The evaluation and action plan will be developed in collaboration with key action partners. The Suicide Prevention Committee may need to recruit new partners into the coalition to be able to address this strategic plan in its entirety.

2. **Develop Action Plan**: An action plan will be critical to the implementation of this strategic plan and can include the objectives, timeline/deadline, interim milestones, lead organizations/individuals, supporting organizations/individuals, resources needed and progress status.

3. **Develop Evaluation Plan**: While this plan includes long-term and short-term outcome measures, a more detailed evaluation plan will better monitor progress and identify areas for improvement. Specifically, the evaluation plan will include logic models for each goal; these logic models map out the pathway from what we are doing (inputs/resources) and the desired change we want to produce (short-/long-term outcomes). The evaluation plan and logic models will also require further exploration on specific data sources and partners who can help collect that data.

For readers of this plan, please consider joining the Suicide Prevention Committee or helping us recruit partners to advance this plan. More information at smchealth.org/SuicidePrevention.
Acknowledgments

“The San Mateo County Mental Health Community is a Nation of Survivors and Believers; working together in love, We Are Limitless.”

– John Butler, Menlo Park
We would like to thank and recognize:

**Community members and community partners** who participated provided input for this Roadmap through written and verbal comments in the online forums on August 13 and 15.

The following **organization/group partners** for their commitment to suicide prevention and their contributions to creating such a critical resource for San Mateo County:

- California Clubhouse
- California Mental Health Services Authority Technical Assistance Team (Your Social Marketer, Inc.)

APPENDIX A:
About the Suicide Prevention Committee

The mission of the San Mateo County Suicide Prevention Committee (SPC) is to provide oversight and direction to suicide prevention efforts in San Mateo County. Created in 2009, this coalition consists of passionate suicide prevention advocates, including suicide attempt survivors, suicide loss survivors and representatives from behavioral health, primary care, emergency health services, social services, law enforcement, transportation, education, communication & media, art & culture, spirituality & faith, and community members. The SPC uses its strategic plan to prioritize and connect efforts to reduce suicide overall and among specific high-risk communities.

The SPC is facilitated by the Office of Diversity and Equity at San Mateo County Behavioral Health & Recovery Services and funded by the Mental Health Services Act (Proposition 63).

Please visit smchealth.org/SuicidePrevention for more SPC information, including specific partners, current projects and meeting schedule.

Photo of the San Mateo County Suicide Prevention Committee (SPC).
APPENDIX B: 2017-2020 Roadmap & Progress

The 2017-2020 San Mateo County Suicide Prevention Roadmap was the county’s first suicide prevention strategic plan. This plan aligned with strategies from the 2008 California Strategic Plan on Suicide Prevention, was informed by stakeholder input and quantitative data and mapped out what existing programs/organizations address the various strategies. The plan included 4 strategies (listed below) and 32 recommended activities.

- **Strategy 1**: Create a Coordinated System of Suicide Prevention
- **Strategy 2**: Implement Training and Workforce Enhancements to Prevent Suicide
- **Strategy 3**: Educate Communities to Take Action
- **Strategy 4**: Improve Suicide Prevention Program Effectiveness and Accountability

After the creation of the Roadmap, an action plan was developed to monitor implementation of the activities and coordinate with partners leading or supporting the activities. During the 2017-2020 time period, 26 of the 32 activities made significant progress. The 6 activities that did not make progress all fell under Strategy 4.

To download a copy of the 2017-2020 San Mateo County Suicide Prevention Roadmap, please visit www.smchealth.org/SuicidePrevention.
APPENDIX C:
2021-2026 Roadmap Development

From about October 2019 through September 2021, the Suicide Prevention Committee (SPC) conducted the planning process for the 2021-2026 San Mateo County Suicide Roadmap. This plan builds off of the previous Roadmap and the 2020-2025 California Suicide Prevention Strategic Plan. The specific steps of this strategic planning process are based on the Suicide Prevention Resource Center Strategic Planning Approach and lessons from the Each Mind Matters Suicide Prevention Strategic Planning Learning Collaborative. The figure below depicts the steps and timeline for San Mateo County’s suicide prevention strategic planning process. There was a two-month pause in the process to address COVID-19 pandemic related matters.

2021-2026 Strategic Planning Timeline
Appendix

APPENDIX D: Suicide Intervention 101

How to Help Someone Considering Suicide

Most people having suicidal thoughts are in a temporary, serious crisis. You can be the one to provide the support and help they need by taking three steps:

1. Know the signs of someone who is having suicidal thoughts.
2. Find the words to have a direct conversation with them.
3. Reach out for help from the many county resources available to those in crisis and their loved ones.

To gain more in-depth knowledge on how to support someone who is considering suicide or at risk of suicide, you can explore www.suicideispreventable.org and/or take one of the following suicide prevention gatekeeper trainings referenced in the figure below. More information on these trainings at smchealth.org/SuicidePrevention.

Suicide Prevention Gatekeeper Training

Applied Suicide Intervention Skills Training

- Advanced ASIST
  - 2 days | Ages 16+
  - English

Mental Health First Aid – Adult/Youth

- Intermediate MHFA
  - 8 hours | Ages 18+
  - English, Spanish, Cantonese, Mandarin, Tongan, Samoan

Introductory BSBB

- 1.5-2 hours | Middle School Age+
  - English additional languages to be offered
How to Talk About Suicide to Reduce Stigma and Encourage Open Dialogue

A powerful way to help prevent suicide is to address the stigma against suicide. Stigma is a major barrier for people to want to talk openly about suicide or seek help if they are considering suicide. The table below includes examples of stigmatizing versus non-stigmatizing language related to suicide.73

<table>
<thead>
<tr>
<th>Stigmatizing Language</th>
<th>Non-Stigmatizing Language</th>
</tr>
</thead>
<tbody>
<tr>
<td>Committed, Completed or Successful Suicide</td>
<td>Died by Suicide</td>
</tr>
<tr>
<td>Person Who Failed a Suicide Attempt</td>
<td>Suicide Attempt Survivor</td>
</tr>
<tr>
<td>Suicidal Person</td>
<td>Person at Risk of Suicide</td>
</tr>
<tr>
<td>Mentally Ill Person</td>
<td>Person Living with a Mental Health Issue, Need or Condition</td>
</tr>
</tbody>
</table>

If you know someone who is in suicidal crisis or emotional distress, please reach out for 24/7 Confidential Crisis Support

call 650-579-0350 or 1-800-273-8255
or text “BAY” to 741741
Suicide data is generally categorized in five categories: (1) Deaths, (2) Attempts, (3) Thoughts, (4) Risk & Protective Factors and (5) Help-Seeking & Prevention. For San Mateo County, suicide data is available from the following data sources:

**Deaths**
1. San Mateo County Coroner’s Office
2. San Mateo County Child Death Review Team
3. San Mateo County Domestic Death Review Team
4. San Mateo County Elder Death Review Team
5. California EpiCenter
6. California Vital Records Business Intelligence System – Mortality Data
7. Caltrain – Fatality Statistics

**Attempts**
8. California Office of Statewide Health Planning & Development – Emergency Department and Hospitalization Data

**Thoughts**
9. California Healthy Kids Survey
10. California Health Interview Survey

**Risk and Protective Factors**
11. California Healthy Kids Survey
12. San Mateo County Health & Quality of Life Survey

**Help-Seeking & Prevention**
13. Star Vista’s Crisis Hotline
14. National Suicide Prevention Lifeline
15. California Measurements, Outcomes, and Quality Assessment
16. California Peer-Run Warmline
17. Institute on Aging Friendship Line
18. San Mateo County Office of Education Documentation on Referral & Assessment
19. San Mateo County Community Stigma Baseline Survey
Data Limitations

Each data source has strengths and limitations in illustrating the suicide trends in San Mateo County. As outlined in Goal 3: Advance Data Monitoring and Evaluation, San Mateo County continues to work on improving data collection and analysis to gain a more nuanced understanding of needs and solutions around suicide and suicide prevention.

Data Analyzed by Office of Epidemiology & Evaluation

The following figures include data analyzed by the Office of Epidemiology & Evaluation in the Public Health, Policy & Planning Division of San Mateo County Health and presented at the December 3, 2019 Suicide Prevention Committee meeting. The data is organized as follows:

1. Suicide Deaths
2. Suicide Attempts – Emergency Department Visits and Hospitalizations
3. Suicidal Thoughts – 9th and 11th Graders
4. Suicide Risk and Protective Factors – Mental Health and Substance Use Indicators
5. Suicide Prevention – Community Stigma

Suicide Prevention — Community Stigma

The following figures include help-seeking and prevention data collected and analyzed by Strata Research, Inc in March 2020. The Community Stigma Baseline Survey was conducted online and surveyed 450 San Mateo County adults that represented the demographics of San Mateo County population. The full report is posted in the “Resources” section at smchealth.org/bhrs/ode.

Two-thirds of adults (64%) agree that suicide is usually preventable.

There were no significant differences by demographics. CA Statewide data results significantly higher for agreeance (90% vs. 64%). CA statewide data source: 2014RAND California Statewide Survey.

Agreement Over Believing Suicide is Usually Preventable

<table>
<thead>
<tr>
<th>Disagree</th>
<th>Neither Agree Nor Disagree</th>
<th>Agree</th>
</tr>
</thead>
<tbody>
<tr>
<td>12%</td>
<td>24%</td>
<td>64%</td>
</tr>
</tbody>
</table>

Note: “Suicide is usually preventable” is true. The World Health Organization highlights that “On the contrary, suicidal people are often ambivalent about living or dying. Someone may act impulsively by drinking pesticides, for instance, and die a few days later, even though they would have liked to live on. Access to emotional support at the right time can prevent suicide.”

One in five adults (21%) agree that talking about suicide can cause suicide.

Key demographics significantly more likely to agree are: 18-34 year olds; Residents with a below median income (≤$100K); Those with children at home. There are no significant differences by CA Statewide data.

Agreement Over Talking About Suicide Can Cause Suicide

<table>
<thead>
<tr>
<th>Disagree</th>
<th>Neither Agree Nor Disagree</th>
<th>Agree</th>
</tr>
</thead>
<tbody>
<tr>
<td>52%</td>
<td>28%</td>
<td>21%</td>
</tr>
</tbody>
</table>

Note: “Talking about suicide can cause suicide” is a myth. The World Health Organization highlights that “Given the widespread stigma around suicide, most people who are contemplating suicide do not know who to speak to. Rather than encouraging suicidal behavior, talking openly can give an individual other options or the time to rethink his/her decision, thereby preventing suicide.”
More than one-third of adults (39%) agree that they don’t have the necessary skills to talk about suicide with a friend, colleague, or family member

There were no significant differences by demographics. There were no significant differences by CA Statewide data.

Agreeance Over Believing They Do Not Have Necessary Skills to Talk About Suicide with Friend/Colleague/Family Member

<table>
<thead>
<tr>
<th>Agreeance</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disagree</td>
<td>36%</td>
</tr>
<tr>
<td>Neither Agree</td>
<td>25%</td>
</tr>
<tr>
<td>Nor Disagree</td>
<td>39%</td>
</tr>
</tbody>
</table>

Note: The San Mateo County community has access to free online resources and gatekeeper trainings that can teach anyone (including those without prior training) on how to talk to loved ones about suicide and connect them to appropriate help when needed. See Appendix D: Suicide Intervention 101 for details.

One-half of respondents (53%) agree that they can identify places or people where they should refer somebody thinking about suicide.

There were no significant differences by demographics. There were no significant differences by CA Statewide data.

Agreeance Over Belief They Can Identify Places/People Where They Should Refer Somebody Thinking About Suicide

<table>
<thead>
<tr>
<th>Agreeance</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disagree</td>
<td>22%</td>
</tr>
<tr>
<td>Neither Agree</td>
<td>25%</td>
</tr>
<tr>
<td>Nor Disagree</td>
<td>53%</td>
</tr>
</tbody>
</table>

Note: Key places to refer someone thinking about suicide is our local and/or national crisis hotlines that offer 24/7 confidential crisis support from a trained counselor. You or your loved one in emotional distress has the following options:

- Call 1-800-273-8255 (TALK) – Suicide Prevention Lifeline (United States)
- Call 650-579-0350 – Star Vista’s Crisis Hotline (San Mateo County)
- Text “BAY” to 741741 – Crisis Text Line (United States)

For physical/mental health emergencies that need an immediate response, call 9-1-1 or go to your nearest emergency room.

Community Stigma Baseline Survey
This section is intended to be a resource directory of suicide prevention-related community resources in San Mateo County.

Please note the resource listed below may not be a complete list. If you have any recommendations on additional programs to add to the section, please contact ODE@smcgov.org.

| Safe and Supportive Schools      | San Mateo County Office of Education has the following suicide prevention related programs or projects:  
  -**SYSTEM of Supports** is a grant funded program that provides Social Emotional Curriculum (SEL), Community Resiliency Model (CRM) Training, Universal Screeners and Care Solace, a mental health care coordination agency, to 12 districts across the county. The program further provides counseling support at 4 high needs districts and targeted SEL to help provide connectedness for certain grade levels.  
  -**Suicide Prevention School Protocol** outlines administrative procedures for intervening with suicidal and self-injurious students and offer guidelines to school site crisis teams in the aftermath of a student death by suicide.  
  -**Documentation of Risk Assessment** is part of the Suicide Prevention School Protocol and documents risk assessment and referrals of students.  
  -The SMCOE supports districts in creating a Positive School Climate on their campuses through Restorative Justice Practices Programs:  
    - Trauma-Informed Schools  
    - RESPECT! 24/7  
    - Camp LEAD                                                                                                                                                                                                                                                                                                                                 | All San Mateo County Schools          | San Mateo County Office of Education

| **Whole Person Care**         | Whole Person Care (WPC) seeks to address the physical, mental health, substance use, and social needs of eligible clients. This is done by strengthening collaboration across divisions and with county and community partners. WPC further enables San Mateo Health to empower staff to provide services relevant to the whole person. WPC augments existing programs to enhance service capacity and funds additional staff to extend services. Ultimately, it serves to support the coordination of health, behavioral health, and social services for the most vulnerable clients with complex needs. | Individuals with serious mental illness who are at risk of acute hospitalization, individuals whose untreated Substance Use Disorder, Individuals with any of the above as well as conditions including homelessness, unstable housing, recent jail discharge, or complex medical conditions. | Lucinda Dei-Rossi
