# MHSA Program Funding Guidelines – Summary

<table>
<thead>
<tr>
<th>MHSA Component</th>
<th>Categories</th>
<th>Funding Allocation (% of total revenue)</th>
</tr>
</thead>
</table>
| Community Services and Supports (CSS)¹ | • Full Service Partnerships (FSP)  
• General Systems Development (GSD)  
• Outreach and Engagement (O&E) | 76%  
FSP should be at least 51% of the CSS allocation |
| Prevention and Early Intervention (PEI)² | • Ages 0-25  
• Early Intervention  
• Prevention  
• Recognition of Signs of Mental Illness  
• Stigma and Discrimination  
• Access and Linkages | 19%*  
Ages 0-25 should be at least 51% of the PEI allocation |
| Innovations (INN)³ | N/A | 5% |

* PEI expenditures may be increased given the department determines that the increase will decrease the need and cost for additional services to severely mentally ill persons in that county by an amount at least commensurate with the proposed increase. The justification must be included in the Three-Year Program and Expenditure Plan and/or the respective Annual Updates.

**Reversion Period:** Counties must expend the revenue received for each core component within 3 years (starting with the year revenue is received) or must return it to the State mental health fund.

**One-time Funding Components:** counties received a one-time allocation to fund strategies in Workforce Education and Training (WET)⁴, Capital Facilities and Information Technology (CF/IT)⁵, and Housing⁶. All one-time funding has been expended. These components can continue to be funded under CSS, as determined by the following additional funding guidelines.

- Up to 20% of the average 5-year total of MHSA funds can be allocated from CSS to the technological needs, capital facilities, human resources, and a prudent reserve.
- Assembly Bill 727 clarifies that counties can fund housing assistance, not just for FSP clients.

**Three-Year Plan and Annual Updates:**

- Up to 5% of total annual MHSA revenues can be allocated for annual MHSA planning efforts.
- All expenditures must be consistent with the current three-year plan or annual update developed through a Community Program Planning (CPP)⁷ process.
  - Current Three-Year Plan Implementation: July 1, 2020 – June 30, 2023
  - Annual Updates Due: June 30th
  - Next Three-Year Planning Phase: January 1, 2022 – June 30, 2022
  - Next Three-Year MHSA Plan Due: June 30, 2022

**Prudent Reserve (PR):** Counties are required to establish and maintain a PR for revenue decreases.

- The 50% Local Prudent Reserve requirement was rescinded (Info Notice 11-05)
- Counties must establish a Prudent Reserve that does not exceed 33% of the 5-year average CSS revenue received (Info Notice 19-017).
- All other policy and guidance remains in effect (Info Notice 09-16 and 18-033).

**Non-supplantation:**

- Funds shall not be used to supplant any state or county funds required to be utilized to provide mental health services, that was in effect on November 2, 2004, nor cost of inflation.
Definitions

1 Community Services & Support (CSS) provides direct treatment and recovery services to individuals of all ages living with serious mental illness (SMI) or serious emotional disturbance (SED):

   a. Full Service Partnership (FSP) plans for and provides the full spectrum of services, mental health and non-mental health services and supports to advance client’s goals and support their recovery, wellness and resilience.

   b. General Systems Development (GSD) improves the mental health service delivery system. GSS may only be used for; treatment, including alternative and culturally specific; peer support; supportive services to assist with employment, housing, and/or education; wellness centers; case management to access needed medical, educational, social, vocational rehabilitative or other services; needs assessment; individual Services and Supports Plans; crisis intervention/stabilization; family education; improve the service delivery system; reducing ethnic/racial disparities.

   c. Outreach and Engagement (O&E) is to reach, identify, and engage unserved individuals and communities in the mental health system and reduce disparities. O&E funds may be used to pay for strategies to reduce ethnic/racial disparities; food, clothing, and shelter, but only when the purpose is to engage unserved individuals, and when appropriate their families, in the mental health system; and general outreach activities to entities and individuals.

2 Prevention & Early Intervention (PEI) targets individuals of all ages prior to the onset of mental illness, with the exception of early onset of psychotic disorders. PEI emphasizes improving timely access to services and reducing the seven negative outcomes of untreated mental illness; suicide; incarcerations; school failure or dropout; unemployment; prolonged suffering; homelessness; and removal of children from their homes.

   a. Early Intervention programs provide treatment and other services and interventions, including relapse prevention, to address and promote recovery and related functional outcomes for a mental illness early in its emergence. Services shall not exceed 18 months, unless the individual receiving the service is identified as experiencing first onset with psychotic features, in which case early intervention services shall not exceed 4 years.

   b. Prevention programs reduce risk factors for developing serious mental illness and build protective factors for individuals whose risk of developing a serious mental illness is greater than average and, as applicable, their parents, caregivers, and other family members. Services may include relapse prevention and universal prevention.

   c. Outreach for Recognition of Early Signs of Mental Illness to families, employers, primary care health care providers, and others to recognize the early signs of potentially severe and disabling mental illnesses.

   d. Access and Linkage to Treatment connects individuals with severe mental illness as early in the onset of these conditions as practicable, to medically necessary care and treatment, including care provided by county mental health programs. Examples include screening, assessment, referral, help lines, and mobile response.

   e. Stigma and Discrimination Reduction activities reduce negative feelings, attitudes, beliefs and/or discrimination related to mental illness or seeking services. Examples include social marketing campaigns, speakers’ bureaus, targeted education and training, anti-stigma advocacy, and efforts to encourage self-acceptance.

   f. Suicide Prevention programs are optional. Activities prevent suicide but do not focus on or have intended outcomes for specific individuals. Examples include campaigns, suicide prevention networks, capacity building, culturally specific approaches, survivor-informed models, screening, hotlines or web-based resources, training and education.

3 Innovation (INN) projects are designed and implemented for a defined time period (not more than 5 years) and evaluated to introduce a new behavioral health practice or approach; make a change to an existing practice; apply a promising community-driven practice or approach that has been successful in non-behavioral health; and has not demonstrated its effectiveness (through mental health literature).

4 Workforce Education & Training (WET) provides clients and families training to help others, promote wellness and other positive outcomes. Providers are able to work collaboratively to deliver client-and family-driven services, outreach to underserved and underserved populations, and provide linguistically and culturally relevant services.

5 Capital Facilities & Technological Needs (CF/TN) includes facilities for the delivery of MHSA services to clients and their families or for administrative offices; support an increase in peer-support and consumer-run facilities; community-based settings; and technological infrastructure to facilitate services and supports.

6 Housing is used to acquire, rehabilitate or construct permanent supportive housing for clients with serious mental illness and provide operating subsidies. This service category is part of CSS.

7 Community Program Planning (CPP) process is used to develop MHSA three-year plans and updates in partnership with stakeholders to identify community issues related to mental illness, lack of services and supports; analyze the mental health needs in the community; and identify and re-evaluate priorities and strategies and includes a 30-day public comment, a public hearing by the local mental health board and local board of supervisors.
